Subject: SPORT ENGLAND RESPONSE - SADDLEWORTH NEIGHBOURHOOD PLAN - SPORT ENGLAND

REFERENCE SP/23/00006001

Thank you for consulting Sport England on the Saddleworth Neighbourhood Plan, our response is set out below.

OVERVIEW:

Government planning policy, within the National Planning Policy Framework (NPPF), identifies how the planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities. Encouraging communities to become more physically active through walking, cycling, informal recreation and formal sport plays an important part in this process. Providing enough sports facilities of the right quality and type in the right places is vital to achieving this aim. This means that positive planning for sport, protection from the unnecessary loss of sports facilities, along with an integrated approach to providing new housing and employment land with community facilities is important.

Sport England provides guidance on developing planning policy for sport and further information can be found via the link below. Vital to the development and implementation of planning policy is the evidence base on which it is founded. https://www.sportengland.org/how-we-can-help/facilities-and-planning-for-sport#planning_applications

PLAYING FIELD PROTECTION:

It is essential therefore that the neighbourhood plan reflects and complies with national planning policy for sport as set out in the NPPF with particular reference to Pars 102 and 103. It is also important to be aware of Sport England's statutory consultee role in protecting playing fields and the presumption against the loss of playing field land. Sport England's playing fields policy is set out in our Playing Fields Policy and Guidance document.

https://www.sportengland.org/how-we-can-help/facilities-and-planning/planning-for-sport#playing_fields_policy

- * Of particular note are Policies 1, 8, 9, 18 which should take account of this.
- * It is also noted that within Policy 9 'Chew Brook Vale' the site at Fletchers Mill appears to contain a playing field.

EVIDENCE BASE:

Sport England works with local authorities to ensure their Local Plan is underpinned by robust and up to date evidence. In line with Par 103 of the NPPF, this takes the form of assessments of need and strategies for indoor and outdoor sports facilities. A neighbourhood planning body should look to see if the relevant local authority has prepared a playing pitch strategy or other indoor/outdoor sports facility strategy. If it has then this could provide useful evidence for the neighbourhood plan and save the neighbourhood planning body time and resources gathering their own evidence. It is important that a neighbourhood plan reflects the recommendations and actions set out in any such strategies, including those which may specifically relate to the neighbourhood area, and that any local investment opportunities, such as the Community Infrastructure Levy, are utilised to support their delivery.

Where such evidence does not already exist then relevant planning policies in a neighbourhood plan should be based on a proportionate assessment of the need for sporting provision in its area. Developed in consultation with the local sporting and wider community any assessment should be used to provide key recommendations and deliverable actions. These should set out what provision is required to ensure the current and future needs of the community for sport can be met and, in turn, be able to support the development and implementation of planning policies. Sport England's guidance on assessing needs may help with such work.

http://www.sportengland.org/planningtoolsandguidance

* Of particular note is Policy 8, 18 and 20 which should take account of this.

DESIGN:

If new or improved sports facilities are proposed Sport England recommend you ensure they are fit for purpose and designed in accordance with our design quidance notes.

http://www.sportengland.org/facilities-planning/tools-guidance/design-and-cost-guidance/

* Of particular note is Policy 1, 8 and 18 which should take account of this.

SPORTS FACILITY DEMAND:

Any new housing developments will generate additional demand for sport. If existing sports facilities do not have the capacity to absorb the additional demand, then planning policies should look to ensure that new sports facilities, or improvements to existing sports facilities, are secured and delivered. Proposed actions to meet the demand should accord with any approved local plan or

neighbourhood plan policy for social infrastructure, along with priorities resulting from any assessment of need, or set out in any playing pitch or other indoor and/or outdoor sports facility strategy that the local authority has in place. Sport England's Playing Pitch Calculators and sports facility planning tools are available to assist with this process and access can be provided on request.

* Of particular note is Policy 12, 18, 20 which should take account of this.

ACTIVE DESIGN:

In line with the Government's NPPF (including Section 8) and its Planning Practice Guidance (Health and wellbeing section), links below, consideration should also be given to how any new development, especially for new housing, will provide opportunities for people to lead healthy lifestyles and create healthy communities. Sport England's Active Design guidance can be used to help with this when developing planning policies and developing or assessing individual proposals.

Active Design, which includes a model planning policy, provides ten principles to help ensure the design and layout of development encourages and promotes participation in sport and physical activity. The guidance, and its accompanying checklist, could also be used at the evidence gathering stage of developing a neighbourhood plan to help undertake an assessment of how the design and layout of the area currently enables people to lead active lifestyles and what could be improved.
